Well, there you are for the 2Q of 2014. I have been on most of these repeaters, and found them to be open and welcoming of hams. I also tossed in satellite SO-50's set of freqs, as well as NOAA and a couple other goodies.

There are some "active" systems that I have left out. This is not an "all-inclusive" list for the Southern California region. But if I encountered unfriendly, un-welcoming, or snobby attitudes, then I did not include them here ... that's NOT what this magnificent hobby is all about.

This list will always be available on the DOCS page at <http://www.k6lcs.com> .

Enjoy! You can always email me at clint@clintbradford.com ... or cruise my "Work the Satellites" Web site at <http://www.work-sat.com> .
